SUMMARY

Brand designer and art director with 15+ years of work for storytelling-driven brands, including Netflix, STARZ, AstraZeneca, and GSK. Moves easily between big-picture concepting, building brand systems, and detailed hands-on craft. Builds living brand systems (design tokens, component libraries, templates, and toolkits) that let product, marketing, and customer-experience teams create on-brand work without waiting on design. Leads launches and campaigns from brief to delivery across web, social, video, and paid channels, with a strong command of typography, color, and composition. Also a front-end developer and motion director, so ideas become working web experiences and moving pieces, not just static comps. Uses AI tools (Midjourney, Adobe Firefly, Claude) to explore and scale work, while keeping the ideas and final craft in human hands.
